St. Francis de Sales College (Autonomous)

About the College

St. Francis de Sales College (Autonomous), popularly known as SFS College, is one of the leading Institutions of Higher Education in Bengaluru, Karnataka. Founded in 2004 with the vision of *Excellence, Efficiency, and Transformation*, and the Mission of *Love of God and Service to Humanity*, the College is run by the Missionaries of St. Francis de Sales (MSFS) of the South West India Province, also known as Fransalians. The College is accredited with "A" grade by NAAC, approved by AICTE, recognized under 2(f) & 12(b) by UGC, and certified under ISO 9001:2015. Permanently affiliated to Bangalore University, the College offers several degree programs at the Bachelors, Masters, and Doctoral levels under various disciplines. In 2024, St. Francis de Sales College received the Autonomous status, and it remains as a center for quality education, equipping the students with the skills, knowledge, and values needed to excel and make a meaningful impact in the world.

Vision and Mission

Vision:

Excellence, Efficiency, Transformation

Mission:

Love of God and service to humanity

_

OBJECTIVE OF THE M.COM DEPARTMENT

To provide advanced education in commerce and related disciplines, equipping students with critical thinking, analytical skills, and practical knowledge to excel in business, finance, and academia. The department aims to foster research, innovation, and ethical leadership in the ever-evolving global market.

VISION:

To be a premier hub for excellence in commerce education, driving innovation and leadership in the global business landscape.

MISSION:

To equip students with comprehensive knowledge and skills, fostering ethical leadership and practical expertise for impactful contributions to business and society.

REGULATIONS PERTAINING TO MASTER OF COMMERCE (M.Com.) COURSE UNDER CBCS SYSTEM FROM 2023-24 ONWARDS

1. Objective:

The broad objective of the Master of Commerce course is to impart to the students, professional education and training in various aspects of business and its environment and provide them with opportunities to develop managerial and analytical skills in order to meet the challenges of business at the national and global level. The platform will also enrich the students to cope up with recent changes in business world.

2. Eligibility for Admission:

A candidate who has passed the B.Com./B.B.A./BMS Degree examination of this University or of any other University recognized as equivalent thereto and has secured not less than 50% of the marks in the aggregate in all the Commerce subjects of Business Education in all the years shall be eligible for admission to the course. In case of SC/ST/CAT-1 students and PWD Students, there will be relaxation of 5% in the minimum required percentage of marks.

3. Duration of the Course:

The course of study for M.Com., degree shall extend over a period of two years divided into 4 (four) semesters. Each Semester will be of 16 weeks or more duration with a minimum of 90 actual working days.

4. Scheme of Instruction:

- 1. In each semester there will be six to seven papers (including practicals)
- 2. There will be 24 to 27 Total hours per week. This includes practicals.

5. Attendance:

Each course (theory/practical) shall be treated as an independent unit for the purpose of attendance. A student shall attend a minimum of 75% of the total instruction hours in a course (theory/practical) including tutorials and seminars in each semester. There shall be no provision for condonation of shortage of attendance and a student who fails to secure 75% attendance in a course, shall be required to repeat that semester.

6. Medium of Instruction:

The medium of instruction shall be English. However, a candidate will be permitted to write the examination either in English

7. Registering for the Examination:

A candidate shall register for all the papers of a semester when he appears for the examination of that semester for the first time

8. Scheme of Examination:

8.1 There shall be a examination at the end of each semester. The maximum marks for the final examination in each paper shall be 100 as shown below:

Particulars	Course	Duration	Internal Assessment	Theory Examination	Total Marks
Subject without Practicals	M.Com	2 years, (4 Semesters)	30	70	100

8.2 For subjects having practical examination (Advanced Research Methodology) theory examination will remain for 70 Marks, but in the place of Internal Assessment, Practical examination will be conducted, the marks allotment is as follows:

Criteria's.	Marks
End Semester Practical Examination	10 Marks
Record	10 Marks
Viva-Voce Examination	05 Marks
Attendance	05 Marks
Total Marks	30 Marks

- 8.3 Each semester will normally have six (Hardcore) and one (soft core) paper and each shall be for 100 marks.
- 8.4 (i) The composition of theory and internal assessment marks for each paper will be 70 and 30 respectively.
 - ii. Duration of examination per theory paper of 70 marks shall be for 3 hours, for practical's it will be 11/2 (one and half) hours for each batch.
 - iii. Practical records will be evaluated as part of the practical examination.
 - iv. In case of practical examinations, students will be assessed on the basis of knowledge of processes, skills operations involved, results/calculations and reporting.
 - v. Practical examination will be conducted by the Board of Examiners with Pre-Approved Panel of Examiners.
- 8.5 Every theory paper shall ordinarily consist of two/three sections, developed to test conceptual skills, understanding skills, comprehension skills, articulation, and application skills in the question paper's composition in examinations.

Continuous Internal Assessment

Post graduate Programs:

Theory:

- 1. Continuous Internal Assessment (C1 & C2) 30 marks
- 2. End Semester Examination 70 marks

Practical

- 1. Continuous Internal Assessment (C1 & C2) 30 marks
- 2. End Semester Practical Examination 70 marks

S./ N	ASSESSMENTS	COMPONENTS	MARKS & ATTENDANCE	IA MAR KS

TOTAL = 70

8.6 other add on Course & Certification Programme:

A. Certification in Emerging Commerce Trends:

Each student must enrol in a certification course from any recognized MOOC platform or Coursera, edX, SWAYAM, NPTEL, AICTE, or Udemy in one of the following emerging commerce 2 hours per weeks total 30 hours programme

- Digital Finance & Blockchain
- FinTech and Financial Innovations
- E-Commerce and Digital Marketing Strategies
- Green Finance and Sustainable Investments
- Data Analytics for Business Decision-Making
- AI and Machine Learning in Commerce
- Cryptocurrency and Decentralized Finance (DeFi)

The duration of the course can range from **8 to 16 weeks**, beginning in the 1st semester. Students must complete the course and submit the certification to the **Head of the Department** by the end of the 2nd Semester.

Objective: This requirement will equip students with relevant industry skills and knowledge in modern commerce, preparing them for the digital transformation happening in the finance and business sectors.

B. Industry-Specific Skill-Based Training Certification Programme:

In the 3rd semester, students must undergo skill-based training from reputed industry organizations like FKCCI (Federation of Karnataka Chambers of Commerce & Industry), MSME, SME, KSSIC (Karnataka State Small Industries Development Corporation), KASSIA (Karnataka Small Scale Industries Association), BCIC (Bangalore Chamber of Industry and Commerce), or through partnerships with startups and emerging businesses in FinTech and digital commerce.

The focus of the training could include:

- Digital Commerce and Online Retail Management
 Advanced Taxation Techniques for Digital Economies
- Sustainability Reporting and Green Financing ○
 Advanced Supply Chain Management in E-Commerce
- o Business Analytics and ERP Systems for Commerce

Students must complete the training and submit their certification before the 3rdsemester examination to the **Head of the Department of PG Studies**. The program should be integrated into the college timetable to ensure students have dedicated time for practical skill development.

Objective: This initiative will ensure that students not only gain theoretical knowledge but also practical, industry-relevant skills that align with modern business demands

8.6.a Industrial Visit

Note: During **3**rd **Semester** Compulsorily Students should undergo Industrial Visit to enhance the Practical Knowledge and Industrial Visit Report should be prepared and Submitted to the College.

8.6.b Dissertation:

Each student will choose business research project/live business problem in a business organization, Institution or Industry, and prepare a dissertation report. He/she will formulate it as a research/consultancy problem, work under the guidance of a faculty member on it during IV semester and submit a report. The report will be evaluated for 70 marks. Project Dissertation guidance for a faculty member will involve a workload of 4 hours per week in a semester.

Dissertation guidance of 8 students by a faculty member will be equivalent to the teaching of one paper per semester. Viva-voce examination will be conducted for 30 marks by COE.

The Research Supervisor should have a Ph.D. degree / a minimum of 10 Years of Research Experience with atleast 10 Publications in UGC Recognized Journals.

9. Board of Examiners and Valuation of Answer Scripts.

- 9.1 There shall be a Board of Examiners for scrutinizing and approving the question papers and scheme of valuation.
- 9.2 About 50% of the examiners appointed for setting of question papers and valuation work in each semester shall be external.
- 9.3 Each written paper shall be valued by one internal examiner and one external examiner.
- 9.4 If the difference in marks between two valuation is more than 15%, the Chairman, BOE shall arrange for third valuation by examiners from the approved panel of examiners.
- 9.5 In case of two valuations, the average of the two valuations and if there are three valuations, the average of the nearest two valuations shall be taken for declaring results. The candidates not satisfied with the results may apply for photocopies of the answer scripts and / or challenge valuation (If University Regulations Permits).

10. Classification of Successful candidates:

Final Result/Grade Description:

Semester/ Programme % of Marks	Semester GPA/ Programme/ CGPA	Grade Alpha Sign	Result/Class Description
90-100	9-10.00	О	Outstanding
80.1-90.0	8.01-9.00	A+	First Class Exemplary
70.1-80.0	7.01-8.00	A	First Class Distinction
60.1-70.0	6.01-7.00	B+	First Class
55.1-60.0	5.51-6.00	В	High Second Class
50.1-55.0	5.01-5.50	С	Second Class
40.0-50.0	4.00-5.00	P	Pass Class
Below 40	Below 4.0	F	Re-Appear

ILLUSTRATION 1 (26 Credits)

Papers	P1	P2	P3	P4	P5	P6	P7	Tot
								al
Max. marks	100	100	100	100	100	100	100	700
% Marks Obtained	77	73	58	76	64	66	82	496
Grade Points Earned (G.P.)	7.7	7.3	5.8	7.6	6.4	6.6	8.2	-
Credits for the Course (C)	4	4	4	4	4	4	2	26
$Total GPW = GP \times C$	30.8	29.2	23.2	30.4	25.6	26.4	16.4	182

Semester Aggregate Marks : 496 / 700 = 70.86%

Classification of Result: First Class with Distinction The GPA shall then be computed by dividing the total GPW of all the courses of study by the total credits for the semester, GPA = Total GPW / Total Credits = 182/26 = 7.0

Semester Alpha Sign Grade: A+

ILLUSTRATION 2 (24 Credits)

Papers	P1	P2	Р3	P4	P5	P6	Total
Max. marks	100	100	100	100	100	100	600
% Marks Obtained	67	73	78	76	84	88	466
Grade Points Earned (G.P.)	6.7	7.3	7.8	7.6	8.4	8.8	1
Credits for the Paper	4	4	4	4	4	4	24
Total $GPW = GP \times C$	26.8	29.2	31.2	30.4	33.6	35.2	186.4

Semester Aggregate Marks: **466** / **600** = **77.67%**

Classification of Result: First Class with Distinction

GPA = Total GPW / Total Credits = 186.4 / 24 = 7.77

Semester Alpha Sign Grade: A++

11. Calculation of Cumulative Grade Point Average (CGPA):

The Cumulative Grade Point Average (CGPA) at the end of the fourth semester shall be calculated as the weighted average of the semester GPW. The CGPA is obtained by dividing the total of GPW of all the four semesters by the total credits for the programme.

ILLUSTRATION I

Semester	I	II	III	IV	Total
Total Marks per Semester	700	700	600	600	2600
Total Marks Secured	496	560	466	510	2032
Semester Alpha Sign Grade	A+	A++	A+	A++	-
Semester GPA	7.0	8.0	7.77	8.5	-
Semester Credits	26	26	24	24	100
Semester GPW	182	208	186.5	204	822.9

Aggregate Percentage of Marks = 2032 / 2600 = 78.15 %

Classification of Result: First Class with Distinction

Cumulative Grade Point Average (CGPA) = Total of Semester GPW / Total

Credits for the programme = 780.5 / 100 = 7.805

Programme Alpha Sign Grade: A++

These are the sample illustrations of computing semester grade point averages and cumulative grade point average and the alpha – sign grades assigned.

12. MINIMUM FOR A PASS:

12.1 A candidate shall be declared to have passed the PG program if he/she secures at least a CGPA of 4.0 (Course Alpha-Sign Grade C) in the aggregate of both internal assessment and semester end examination marks put together in each unit such as Theory Papers / Practical's / Project Work / Dissertation / Viva-Voce.

- 12.2 The candidates who pass all the semester examinations in the first attempts are eligible for ranks provided they secure at least CGPA of 6.0 (or AlphaSign Grade A).
- 12.3 The results of the candidates who have passed the fourth semester examination but not passed the lower semester examinations shall be declared as NCL (Not Completed Lower semester examinations). Such candidates shall be eligible for the degree only after completion of all the lower semester examinations.
- 12.4 A candidate who passes the semester examinations in parts is eligible for only Class / CGPA and Alpha-Sign Grade but not for ranking.
- 12.5 There shall be no minimum in respect of internal assessment. However minimum pass in each paper shall be 40% in semester end exam (25 Marks out of 70 Marks) and 50% aggregate of all papers in that semester including practical paper.
- 12.6 A Candidate who fails in any of the unit / dissertation / viva-voce shall reappear in that unit / dissertation / viva-voce and pass the examination subsequently.

13. CARRY OVER PROVISION: Candidates who fail in a lower semester examination may go to the higher semesters and take the examinations.

14. REJECTION OF RESULTS:

- i. A candidate who fails in one or more papers of a semester may be permitted to reject the result of the whole examination of that semester. **Rejection of result paper wise shall not be permitted**. A candidate who rejects the results shall appear for the examination of that semester in the subsequent examination.
- ii. Rejection shall be exercised only once in each semester and the rejection once exercised shall not be revoked.
- iii. Application for rejection along with payment of the prescribed fee shall be submitted to the Registrar (Evaluation) through the department/college together with the original statement of marks within 30 days from the date of publication of the result.
- iv. A candidate who rejects the result is eligible for only class and not for ranking.

15. IMPROVEMENT OF RESULTS:

i) A candidate who has passed in all the papers of a semester may be permitted to improve the result by reappearing for the whole examination of that semester.

- ii) The reappearance could be permitted twice during double the period without restricting it to the subsequent examination only. The regulation governing maximum period for completing various degree/ diploma programme notified by the University from time to time shall be applicable for improvement of results also.
- iii) The student could be permitted to apply for the improvement examination 45 days in advance of the pertinent semester examination whenever held.
- iv) If the candidate passes in all the subjects in reappearance, higher of the two aggregate marks secured by the candidate shall be awarded for that semester. In case the candidate fails in the reappearance, candidate shall retain the first appearance result.
- v) A candidate who has appeared for improvement is eligible for class only and not for ranking. Internal assessment marks shall be shown separately in the marks card. A candidate who has rejected the result or who, having failed, takes the examination again or who has appeared for improvement shall retain the internal assessment marks already obtained.

A candidate who fails in any of the semester examinations may be permitted to take the examinations again at a subsequent appearance as per the syllabus and scheme of examination in vogue at the time the candidate took the examination for the first time. This facility shall be limited to the following two years.

16. POWER TO REMOVE DIFFICULTIE

- i) If any difficulties arises in giving effect to the provisions of these regulations, the Vice- Chancellor may by order make such provisions not inconsistent with the Act, Statutes, Ordinances or other Regulations, as appears to be necessary or expedient to remove the difficult
- ii) Every order made under this rule shall be subject to ratification by the Appropriate college Authorities
- 17. UPDATION OF SYLLABUS The BOS has to revise the syllabus from time to time based on current trends and updations where ever it is necessary. The suggestions of faculties of commerce, considered for revision and updation of the syllabus with prior approval of BOS-PG Commerce, Faculty of Commerce and the Academic Council of the college.

PROGRAM OUTCOME FOR M.COM.

	TROCKAM OUTCOME FOR M.COM.
PO1	Understanding of Advanced Business Concepts: Graduates will acquire indepth knowledge of core commerce subjects such as finance, economics, and international business.

Case Stud	ly: Digital Currencies in Global Trade				
Focuses on how blockchain and cryptocurrencies can streamline cross-border trade, reducing costs and settlement times. It analyses how digital currencies could alleviate issues in the balance of payments and correct disequilibrium. Source: Deloitte Insights					
COURSE OB	JECTIVE:				
On successful	completion of the course, the students will be able to understand the Principles &				
Systems of No	te Issue present in India and other countries. The contents will expose students to the				
depth of the Do	omestic and International Monetary system and practices in general.				
COURSE OU	TCOME :				
C O 1	Understand the evolution and functions of money, from barter to cryptocurrencies.				
CO2	Analyse key monetary theories and their impact on economic stability				
C O3	Evaluate various monetary standards, including gold and digital currencies				
C O 4	Understand the international financial system and innovations like FinTech and DeFi.				
C O 5	Analyse the structure and components of BOP and BOT, including the role of				
	blockchain in trade				

Teaching Pedagogy:

Constructivist Learning Model with Technology Integration: This teaching approach encourages students to construct their own understanding and knowledge of the subject through experiencing things and reflecting on those experiences. It combines traditional educational methods with modern technology, emphasizing active participation and collaboration. The curriculum incorporates real-world case studies, interactive simulations, and analytical tools to explore monetary theories and the impact of digital finance.

5 Skill Developments:

• Critical Thinking: Students analyse various monetary theories and assess the impacts of monetary policy decisions in different historical and contemporary contexts.

- Adaptability: Learning to adapt to the rapidly changing financial environments influenced by digital currencies and blockchain technologies.
- **Technological Fluency**: Gaining proficiency in using modern financial tools, from blockchain applications to financial modelling software.
- **Global Perspective**: Understanding international finance systems, including different monetary standards and policies, fostering a broader worldview.
- Communication: Developing clear and persuasive communication skills, necessary for articulating complex financial concepts and strategies in diverse professional settings.

COURSE OBJECTIVE

On successful completion of the course, the students will be able to learn nature, scope and structure of Global Business Environment, and understand the influence of various environmental factors on global business **operations**

COURSE (COURSE OUTCOME		
CO1	Understand the nature, scope, and structure of the global business environment.		
CO2	Analyse the influence of various environmental factors on international business operations.		
CO3	Comprehend the dynamics of international trade, investment, and economic institutions.		
CO4	Evaluate the role of multinational corporations and global competitiveness.		

CO5	Recognize the importance of social responsibilities and ethical practices in global
	business.

Teaching Pedagogy:

Blended Learning Approach: Combines traditional lectures with digital tools, real-world case studies, and interactive discussions to enhance engagement and foster a deeper understanding of monetary systems, digital currencies, and international finance.

Skill Developments:

- Analytical Skills: Critical evaluation of monetary theories and digital currencies.
- Collaborative Skills: Group projects on international financial systems and digital economies.
- Technological Proficiency: Use of FinTech tools and blockchain applications.
- Global Awareness: Understanding international monetary policies and cross-border financial trends.

Name of the Program: Master of Commerce Name of the Course: PRINCIPLES AND PRACTICES OF BUSINESS DECISIONS

Semester 1

Syllabus.

Course Code	24M.CO1.3	Course Title	PRINCIPLES AND PRACTICES OF BUSINESS DECISIONS
Course Type	DSC	Total hours	60
Credit	4	No of hours per week	4

Module 1 Introduction to Economics: Introduction to economics, macroeconomics, and its interface with business and industry. Nature and Scope of managerial economics. Objectives of the firm, Economic, Managerial and Behavioural theories of the firm. Resources and Goals of an economic systems, Perfect Market, Free market and Mixed Economy. National Income and product concept, computation of National Income and related aggregates, problems in computation of national income. Concept of GDP, GNP, NDP and NNP. triple bottom line approach—economic, social, and environmental goals of firms. (new concept)

Module 2 Public Financial Policy: Public Finance branches – Principle of maximum social advantages – Sources of public revenue – canons of taxation – direct and indirect taxes impact and incidence – effects of taxation on production, consumption and distribution side of economy– recent policy changes in direct and indirect – public expenditure – causes for growth – effects of public expenditure – public debt – sources of public borrowing – methods of debt redemption – debt trap - budget – types and deficit. green taxes and carbon pricing(new concept)

Module 3: Demand Analysis & Consumer Choice: Individual and market demand functions; Law of
demand, determinants of demand; Elasticity of demand – its meaning and importance; price elasticity, income elasticity and cross elasticity – Using elasticity in managerial decisions; numerical problems and case studies. Introduction to Consumer Choice, Sovereignty, Cardinal and ordinal utility approach, indifference approach, revealed preference and theory of consumer choice under risk; Demand estimation for major consumer durable and non-durable products; Behavioural economics in understanding consumer choices in the digital age Demand forecasting techniques; numerical problems and case studies. (new concept)
Module 4: Production Theory: Production function – production with one and two variable inputs,
Stages of production; Economies of scale; Estimation of production function; cost theory and estimation; Economic value analysis; Short and long run cost functions – their nature, shape and inter-relationship; Law of returns to scale; numerical problems and case studies
Module 5 Pricing Practices & Strategies: Determinants of pricing policy, pricing methods: Marginal
Cost Pricing, Target Rate Pricing, Product Line Pricing, administered pricing, competitive bidding, dual pricing, transfer pricing. Price discrimination: requirements, types and dumping strategies. Pricing over product life cycle: skimmed pricing, penetration pricing, product –line pricing and price leadership. Impact of pricing on business decisions

REFLECTIVE AND CASE STUDIES:

Yale School of Management Case Studies: Yale SOM offers a comprehensive collection of realworld case studies that cover a variety of topics in economics and business management. These cases are widely used in academic settings, including case studies like the financial strategies at Hertz and the "Coffee 2016" case. You can explore their top 40 most popular case studies here <u>Yale SOM</u>

ETCases: This platform offers a wide range of managerial economics case studies. One notable example is the Tata Steel case, which explores international ventures and electricity issues in the ferrochrome industry. You can find additional resources on open access electricity and its role in reducing costs for industries. Explore more on ET Cases here ET Cases

Economics Network: A valuable resource for case studies specifically aimed at teaching managerial and business economics. This platform provides access to numerous cases, including topics such as pricing, competition, and firm boundaries. Find case materials from institutions like Harvard Business School and NYU Stern here Economics Network

COURSE OBJECTIVE

To familiarise students with key macro-economic variables and their behaviour, and enable them to critically evaluate different economies and to enable students to integrate macroeconomic analysis into business decisions.

COURSE OUTCOME			
CO1	Understand the nature and scope of managerial economics and its relevance to		
	business.		
CO2	Analyse public financial policy, including taxation, public expenditure, and debt		
	management.		

CO3	Apply demand analysis, elasticity, and behavioural economics to consumer choice and
	business decision-making
CO4	Evaluate production theory, cost estimation, and returns to scale in business operations.
CO5	Develop pricing strategies and practices based on market dynamics and product lifecycle stages

Teaching Pedagogy:

Incorporate interactive lectures that focus on real-world economic examples and case studies. Use group discussions and debates on current issues to foster critical thinking. Conduct problem-solving sessions for quantitative topics, ensuring practical application. Integrate blended learning, combining in-class instruction with online resources for deeper engagement.

Skill Development:

- **Analytical Thinking**: By solving numerical problems related to demand estimation and cost theory.
- **Problem-Solving**: Through case-based exercises on pricing strategies and public finance.
- Critical Thinking: Developed through debates on taxation, public debt, and sustainability policies.
- Quantitative Skills: Enhanced via computation exercises in national income and elasticity calculations.
- Communication: Strengthened through presentations and group discussions on economic theories.

REFLECTIVE AND CASE STUDIES

E-Commerce Security and Customer Satisfaction Impact

This study reviews how security issues impact customer satisfaction in e-commerce. It explores encryption, authentication methods, and secure transactions, providing insight into modern security practices and challenges in online business. <u>IEEE Xplore Publication IEEE Xplore</u>

Data Privacy in E-Commerce: Navigating Challenges

This article outlines the significance of data privacy in e-commerce, focusing on compliance with laws like GDPR and CCPA. It provides a practical overview for businesses to prioritize customer trust and secure data handling. Innovify

Cybersecurity in E-Commerce: US Legal Landscape

This article delves into the legal complexities of e-commerce in the US, covering data privacy regulations, automatic renewals, and the rise of cyber threats. It also highlights significant legal cases and best practices for e-commerce security. Dentons <u>Home</u>

COURSE OBJECTIVE

On successful completion of the course, the students will be able to understand E Commerce Business Models, Security Threats & Protections as well as application of Technology in every corner of the business in the world

COURSE OUTCOME

CO1	Understand the fundamentals of E-commerce, its evolution, business models, and its
	impact on traditional commerce.
CO2	Analyse the hardware and software requirements for E-business and explore digital
	retailing and virtual shopping technologies.
CO3	Evaluate privacy, internet security, encryption methods, and solutions to modern
	cybersecurity threats in E-commerce
CO4	Gain insights into the IT Act of 2000 and its amendments, along with cyber laws, fraud
	prevention, and key legal considerations in India.
CO5	Understand Electronic Data Interchange (EDI), its standards, working, and challenges in
	modern digital commerce

Teaching Pedagogy:

Incorporate **experiential learning** by having students explore real-world e-commerce platforms. Use **collaborative projects** where students design mock e-commerce websites, integrating security measures. Facilitate **role-playing** activities to simulate cybercrime scenarios and legal challenges. Provide **hands-on workshops** on the use of encryption, VPNs, and firewalls.

Skill Development:

- **Digital Literacy**: By navigating e-commerce tools and software for secure transactions.
- Collaborative Work: Through group projects focused on business models and digital ecosystems.
- Ethical Awareness: By discussing cyber laws, privacy, and online ethical issues.
- Adaptability: Learned by keeping up with fast-changing e-commerce technologies.
- Strategic Thinking: Developed by creating business models and identifying ecommerce opportunities and threats.

REFLECTIVE AND CASE STUDIES.

Harvard Business School Case Studies - These include detailed case studies on topics like **capital budgeting**, **risk analysis**, and **investment decisions**. For example, you can find cases such as "Hapag-Lloyd AG: Complying with IMO 2020," which discusses capital budgeting under new environmental regulations. Available through the Harvard Business website here(<u>Harvard Business School</u>

Cases in Corporate Finance by Mayank Joshipura & Sachin Mathur - This book provides several real-world case studies on dividend payouts (e.g., **Mahindra and Mahindra**), capital structure decisions (e.g., **Reliance Industries Limited**), and valuation under mergers and acquisitions. It's a valuable resource for both theoretical insights and practical applications, including complex problems in corporate restructuring. Explore the topics on Routledge

COURSE OBJECTIVE.

On successful completion of the course, the Students will be able to understand the advanced tools and techniques used in evaluating projects for financial decisions. The theories on financial management concepts will help the students to attain a greater anatomy on effective financial decision making in business

1	$\Box \mathbf{O}$	TIL	C 1	7	$\overline{\mathbf{Q}}$	TIT	ΓC	$\overline{\Omega}$	ME	•

CO1	Gain	a	thorough	understanding	of	finance	concepts,	principles,	and	financial
	mana	ger	nent appro	aches, including	opt	imal capi	tal structur	e and capita	1 budg	geting.

CO2	Develop skills in evaluating investment decisions, applying various capital budgeting techniques, and understanding the implications of opportunity costs
CO3	Analyse risk in capital budgeting by utilizing risk analysis techniques like sensitivity analysis, decision trees, and Monte Carlo simulations
CO4	Understand corporate restructuring strategies such as mergers, acquisitions, and valuation methods used in M&A decisions
CO5	Learn dividend and working capital management decisions, including theories and policies affecting corporate financial decisions.

Pedagogy:

Adopt interactive problem-solving sessions where students solve real-world financial cases. Use concept-based discussions on capital structure and investment decisions. Implement simulation exercises on risk analysis and corporate restructuring. Conduct flipped classroom activities where students present topics like dividend policies.

Skill Development:

• **Financial Decision-Making**: Developed by evaluating capital structure and corporate restructuring cases.

- Quantitative Analysis: Enhanced through solving problems on NPV, IRR, and capital budgeting techniques.
- **Risk Management**: Cultivated by analysing risk factors in investment and corporate mergers.
- **Strategic Thinking**: Gained by understanding trade-offs in capital and dividend decisions.
- Leadership: Strengthened through team-based financial case presentations and problem-solving.

REFLECTIVES AND CASE STUDIES.

IBM's AI Tools for Employee Retention: IBM's Watson AI predicts which employees are at risk of quitting, allowing managers to take action and reduce turnover. This use of predictive analytics improved IBM's retention rate by 25%. It also enhances personalized skill development, tailoring learning initiatives based on employee strengths and career goals. More details on AI's role in HR are available here(AI HR institute

Quantum Workplace and Employee Engagement: A case study on Quantum Workplace shows how a manufacturer reduced employee turnover through targeted engagement and pulse surveys. This company used data to address specific issues like workload expectations and compensation clarity. The study offers insights into improving engagement using survey analytics. Read more hereQuantum Workplace

Meritrust Credit Union's Retention Strategy: Meritrust Credit Union implemented customized surveys to understand why employees stay or leave. Their findings, which emphasized the importance of workplace culture and career advancement, shaped their retention strategies. This realworld case highlights the impact of understanding employee motivations for better retention. Access the study hereQuantum Workplace

Mutual of Omaha's Pulse Surveys: Mutual of Omaha deployed pulse surveys to gather insights on employee preferences and perceptions, particularly in competitive talent markets. By listening to feedback and taking action, the company significantly improved retention and new hire satisfaction.

More details can be found hereQuantum Workplace

COURSE OBJECTIVE.

On successful completion of the course, the students will be able to understand the core concepts of Talent management and application of Talent management in various multi-disciplinary areas.

COURSE OUTCOME. Gain a comprehensive understanding of talent management, its history, scope, processes, and the role of HR, including both monetary and non-monetary rev	•
processes, and the role of HR, including both monetary and non-monetary rev	•
	vard
strategies.	
CO2 Learn strategic talent planning and acquisition techniques, including successi	on
planning, innovative recruitment processes, and virtual onboarding	
CO3 Develop skills to enhance employee engagement and retention using modern	tools
such as feedback platforms, gamification, and technology-enhanced strategies	
CO4 Understand the role of IT and HR analytics in talent management, including the	ne use
of AI for real-time performance tracking and continuous improvement.	
CO5 Address contemporary challenges in talent management, including AI application	ons, e-
frauds, and best practices specific to the Indian context	

Pedagogy: The course will emphasize interactive learning with real-world applications of talent management principles. Case studies and AI-based tools will be integrated into class discussions. Practical HR tools for employee engagement and retention will be explored. Guest lectures from industry professionals will provide further insight.

Skill Development:

Understanding the strategic aspects of talent acquisition and engagement.

- Ability to use AI tools for analysing employee retention and performance metrics.
- Skill in evaluating and implementing modern HR technology for talent management.
- Enhanced decision-making for talent planning and succession strategies.
- Expertise in handling contemporary challenges in managing human capital effectively.

REFLECTIVE AND CASE STUDIES.

- **Reflective Study:** o Analyze a company's corporate communication strategy and its impact on stakeholder engagement.
- Case Study: o "The Role of Corporate Communication in Crisis Management"
 - Harvard Business Review
 - o Public Speaking: The Key to Successful Leadership" <u>Toastmasters International</u> o
 "Effective Cross-Cultural Communication in Business" <u>Forbes</u> o "The Art of
 Presentation Skills" <u>LinkedIn Learning</u> o "How Technology is Transforming Corporate
 Communication" <u>McKinsey & Company</u>

COURSE OBJECTIVE.

The course aims to equip students with essential corporate communication skills, including public speaking and soft skills, to enhance their effectiveness in organizational settings. It also emphasizes the integration of technology in communication practices to adapt to modern business environments.

COURSE OUTCOME. CO1 To sharpen the Analytical, written, non-verbal, Spoken Communication and interpersonal skills essential in organizations involving Decision making and implementation

Pedagogy

The course will utilize interactive lectures, group discussions, case studies, role-playing, and hands-on presentations to foster practical understanding. Students will engage in peer feedback sessions to enhance their communication skills in real-world contexts.

Skill Development

- Effective Communication: Mastering verbal and non-verbal communication techniques.
- Public Speaking: Developing confidence and clarity in delivering presentations.
- Interpersonal Skills: Enhancing collaboration and relationship-building abilities.
- Cross-Cultural Awareness: Understanding diverse communication styles across cultures.
- **Digital Proficiency:** Utilizing technology for effective virtual communication and presentations.

 Reflective

 Study: Analyze credit risk factors in a specific industry.

 Case

 Study: "Understanding Credit Risk" McKinsey & Company

COURSE OBJECTIVE

On successful completion of the course, the students will be able to understand the basic knowledge of risk, type of risks and tools of risk management. They can understand the role of derivatives as financial instruments to mitigate the risks in Business.

COURSE OUTCOME Understand various types of risks in business, including their sources, classification, and risk management techniques. CO2 Analyze credit risk management models and their role in assessing creditworthiness and managing default risk

CO3	Comprehend market and operational risks, including Value at Risk (VaR) models
	and operational risk management processes.
CO4	Explore the fundamentals of derivatives, including their functions, types, and recent
	trends in the derivatives market.
CO5	Learn about futures, options, and swaps, their pricing models, and emerging challenges like crypto derivatives and regulatory concerns.

Pedagogy

The course will employ a blend of lectures, interactive discussions, case studies, simulations, and group projects to enhance understanding. Students will engage in hands-on activities to apply theoretical concepts in real-world scenarios, fostering critical thinking and problemsolving skills.

Skill Development

- **Analytical Thinking:** Enhancing the ability to assess risk factors and make informed decisions.
- Quantitative Skills: Developing proficiency in financial modelling and risk assessment techniques.
- Communication Skills: Cultivating effective communication strategies for presenting risk analyses.
- **Technological Proficiency:** Familiarity with risk management software and tools.
- Ethical Judgment: Understanding the ethical implications of risk management decisions in business contexts.

REFLECTIVE STUDIES AND CASE STUDIES

- Reflective Study: Analyze ethical dilemmas faced in research.
- Case Study: "Plagiarism in Academic Research" Elsevier
- "Understanding Research Design" SAGE Journals "The Importance of Reliability in Research" APA
- Discuss the significance of sample size in research.
- Case Study: "Sampling Techniques in Social Research" ResearchGate
- Research Software: SPSS, AMOS, R, Python
- Reflective Study: Explore the impact of statistical software on research outcomes.
- Case Study: "Using SPSS for Data Analysis" IBM, https://scholar.google.co.in/scholar?q=Case+Study:+%22Using+SPSS+for+Data+Analysis%22+-+IBM&hl=en&as sdt=0&as vis=1&oi=scholart •

COURSE OBJECTIVE

On successful completion of the course, the students will be able to learn concepts, tools and techniques of the methodology of business research. It also gives an opportunity to do a research / consultancy project in future.

COURSE OUTCOME		
CO1	Understand the fundamentals of research, including its characteristics, objectives, types, and ethical considerations.	
CO2	Develop skills in selecting and defining research topics, identifying research gaps, and designing effective research methodologies	
CO3	Learn data measurement techniques, processing methods, and the importance of reliability and validity in research	
CO4	Gain knowledge of sampling methods and hypothesis testing, including statistical significance, errors, and sample size determination	
CO5	Analyze data using statistical tests and research software, and understand the process of report writing and reference management tools	

Pedagogy

The course will employ experiential learning through real-world research projects, allowing students to engage directly with data collection and analysis. Interactive lectures will be complemented by guest speakers from academia and industry to provide diverse perspectives. Collaborative group work will foster peer learning and critical discussions.

Skill Development

- **Research Design:** Gaining expertise in formulating robust research designs tailored to specific inquiries.
- Quantitative Literacy: Enhancing skills in interpreting statistical data and understanding its implications.
- Literature Review Skills: Developing the ability to conduct thorough literature reviews and synthesize findings effectively.
- **Presentation Skills:** Improving capabilities in presenting research findings clearly and persuasively to diverse audiences.
- **Project Management:** Learning to manage research projects, including planning, execution, and evaluation phases.

REFLECTIVE STUDIES AND CASE STUDIES

AI and Digital Transformation in Retail: Case Study of Zara's Marketing Strategies

Zara has become one of the most successful fast fashion brands by integrating AI-driven technology to forecast trends and optimize the supply chain. The case delves into how Zara uses machine learning to analyse customer behaviour and implements real-time data analytics for inventory management, leading to effective digital marketing campaigns. *Available at:* Harvard Business Publishing

Leveraging Data-Driven Strategy in Digital Marketing: Case of Netflix

Netflix employs an advanced recommendation algorithm and monitors consumer behaviour in realtime. This case explores the role of data warehouses, segmentation, and personalization in online content delivery, creating a seamless customer experience. *Access at:* Netflix Case Study - Harvard Business Review

Customer Retention and Engagement: The HubSpot CRM Case

This reflective study involves analysing HubSpot's approach to customer relationship management (CRM) and customer retention through its inbound marketing strategies. The case illustrates how HubSpot uses automation, analytics, and CRM platforms to build long-lasting customer relationships.

Get the case here: HubSpot Case Study

Voice Search Optimization and AI-Driven SEO: A Case Study on Domino's Pizza

Domino's Pizza has been a leader in digital transformation within the food industry. This case discusses how Domino's adopted AI, voice search optimization, and chatbot integration into its

marketing strategy, enhancing its online presence and customer interaction. Learn

more: Domino's AI-Driven Marketing Strategy

Ethical Issues in Digital Marketing: Facebook's Data Privacy Controversy

This case examines the ethical and legal implications surrounding Facebook's data privacy scandal in 2018. Students will reflect on how the digital divide, cybersecurity, and privacy issues impact consumer trust and the role of regulations in ensuring ethical digital marketing practices.

Case available at: Harvard Business Review

COURSE OBJECTIVE

On successful completion of the course, the students will gain industry background knowledge to knowledgeably navigate Digital Marketing topics including Digital advertising, search, social media, and online privacy.

COURSE OUTCOME

CO1	Understand the fundamentals of digital marketing, including its objectives, scope,
	benefits, and challenges, as well as the impact of AI and automation.
CO2	Analyze the digital marketing environment, covering online product development,
	pricing, distribution, promotion strategies, and SEO techniques.
CO3	Explore data-driven marketing strategies, online consumer behaviour, and global e-
	marketing trends, along with advanced research tools.
CO4	Learn customer acquisition and retention strategies, focusing on social media,
	CRM platforms, and web analytics tools like Google Analytics

CO5	Examine emerging issues in digital marketing, including online governance, ethical
	and legal concerns, cybersecurity, and the role of social media applications.

Pedagogy

The course will employ a combination of interactive lectures, case study analysis, and practical digital marketing workshops. Group projects will foster collaboration and critical thinking. Students will also engage in online simulations of digital marketing campaigns to gain handson experience. Reflective assignments and peer evaluations will encourage continuous learning and improvement. Webinars and industry expert sessions will provide real-world insights.

Skill Development

- **SEO Optimization:** Acquiring practical skills in search engine optimization and content strategy
- **Digital Campaign Management:** Mastering the creation and execution of social media and email marketing campaigns.
- **Analytical Tools Proficiency:** Developing expertise in tools like Google Analytics and CRM platforms for data-driven decision-making.
- Strategic Thinking: Learning to design and implement comprehensive digital marketing strategies.
- Content Creation: Enhancing creativity and technical skills in producing targeted and engaging online content.

REFLECTIVE STUDIES AND CASE STUDIES

1. Exercise on Entrepreneurial Leadership:

Reflect on how different types of entrepreneurs (e.g., Gig Economy Entrepreneurs, Digital Nomads) contribute to economic development in today's world. What are the unique challenges these entrepreneurs face in comparison to traditional entrepreneurs? *Source: Harvard Business Review - The Gig Economy*

2. Case Study on Social Ventures: The Case of Araku Coffee

This case highlights how social entrepreneurship can foster economic development in underdeveloped regions. Araku Coffee is a venture by Indian tribal farmers supported by a non-profit trust, exemplifying entrepreneurial leadership and social responsibility. *Available at: Harvard Business Review*

3. Exercise on New Venture Planning:

Reflect on the critical elements of a business plan and why startups often face failures in their initial stages. Analyze a recent case of an Indian startup that struggled in its first year and the factors contributing to its challenges. *Source: Why Startups Fail*

4. Case Study on Franchising: McDonald's in India

This case explores the success and challenges faced by McDonald's when adapting its global franchise model to the Indian market. It examines franchising laws, marketing strategies, and the unique challenges posed by India's business environment. *Read more:* <u>Harvard</u> <u>Business Review</u>

5. Exercise on Venture Financing:

Discuss the key considerations for startups seeking venture capital funding in India. Reflect on how angel investors and venture capitalists evaluate risks, particularly in the Indian market context.

Source: Venture Capital in India

COURSE OBJECTIVE

On successful completion of the course, the students will gain in-depth knowledge on venture creation and development of business plan. The students are exposed to successful entrepreneurship stories and encourage them to start their own enterprise.

cheourage i	theodrage them to start their own enterprise.		
COURSE	OUTCOME		
CO1	Understand the fundamentals of entrepreneurship, including types, functions, and the role of entrepreneurs in economic development, along with recent government policies promoting entrepreneurship.		
CO2	Learn about entrepreneurship development and leadership, exploring different types of start-ups, entrepreneurial leadership, creativity techniques, and contemporary trends like the gig economy and disruptive technology.		
CO3	Develop skills in new venture planning, covering venture initiation, franchising, marketing plans, and the creation and evaluation of business plans.		
CO4	Explore venture financing, including stages, sources like venture capital, angel investment, crowdfunding, and the evaluation process for new ventures.		
CO5	Analyze legal and ethical issues for ventures, focusing on business formation, intellectual property protection, corporate governance, and sustainability challenges for startups in India.		

Pedagogy:

The course will integrate lectures, interactive workshops, and case study analyses to engage students in entrepreneurial concepts. Group projects will simulate startup creation, while online simulations will provide practical exposure to venture planning and financing. Guest lectures from successful entrepreneurs and industry experts will offer real-world insights. Regular feedback and self-reflective assignments will support continuous learning. Online resources and case studies from Harvard Business Review will enhance theoretical understanding.

• Skill Development:

Entrepreneurial Mindset: Cultivating creativity, risk-taking, and opportunity recognition skills.

Business Planning: Gaining proficiency in creating comprehensive business plans and marketing strategies.

Financial Acumen: Learning to evaluate financing options like venture capital, angel investment, and crowdfunding.

Legal Understanding: Understanding business formation, intellectual property, and compliance requirements.

Leadership and Communication: Developing leadership qualities and effective communication skills for managing startups.

REFLECTIVE STUDIES AND CASE STUDIES

Exercise on Indian Ethos and Western Management:

Reflect on the differences between Indian and Western management approaches. How does Indian Ethos, as drawn from texts like Kautilya's Artha shastra, influence leadership and decision-making compared to Western management models? *Source: Indian Business and Management*

Case Study on Work Ethos and Values: Infosys and Ethical Leadership

This case study explores how Infosys, one of India's leading IT firms, upholds value-based management in its global operations. It discusses the challenges and successes of integrating Indian values with global business strategies.

Available at: Harvard Business Review Exercise

on Moral Leadership and Values:

Reflect on how personal characteristics and values contribute to effective leadership in Indian organizations. Compare these with global leadership models and assess the role of self-awareness in driving moral leadership.

Source: Ethical Leadership in India

Case Study on Leadership Development: Tata Group's Leadership Training

This case study highlights the Tata Group's leadership development program, which integrates emotional intelligence, feedback, and mentoring to build strong leaders within the organization. It examines how traditional Indian values are incorporated into modern leadership training. *Read more: Harvard Business Review*

Exercise on Stress Management:

Reflect on the importance of stress management techniques such as yoga and meditation in maintaining mental health and productivity in the corporate environment. How does the Indian perspective on stress management differ from Western approaches?

Source: <u>Harvard Meditation Techniques</u>

COURSE OBJECTIVE

On success	ful completion of the course, the students will be able to learn Indian Ethos and values
along with	its relevance on Leadership to take managerial decision making in the organization.
COURSE	OUTCOME
CO1	Understand the fundamentals of Indian ethos in management, including principles
	from Indian culture, Kautilya's Artha shastra, and their application in modern
	business practices.
CO2	Explore work ethos and values, their impact on Indian managers and
	stakeholders, and the relevance of value-based management in a globalized
	world.
CO3	Learn leadership concepts and development, focusing on personal traits, moral
	leadership, communication skills, and the influence of Indian ethos on leadership
	and personality development.
CO4	Develop leadership skills, including goal setting, conflict resolution, emotional
	intelligence, and creative leadership, with tools like 360-degree feedback and
	mentoring.
CO5	Analyze stress management techniques, focusing on causes, consequences, and
	methods like meditation, yoga, and mental health practices from an Indian
	perspective

Pedagogy:

The course will employ a blend of lectures, case studies, and reflective discussions to engage students with the core concepts of Indian ethos and leadership. Group activities, real-life case simulations, and guest lectures will encourage application of theoretical knowledge to practical situations. Focus will be placed on experiential learning through personal reflections and debates on management practices. Online resources and Indian management case studies will supplement classroom learning, fostering a deeper understanding of course material.

Skill Development:

- Ethical Decision Making: Building the ability to incorporate ethical considerations and values into management decisions.
- Leadership Skills: Developing leadership qualities with an emphasis on selfawareness, emotional intelligence, and moral leadership.
- Stress Management: Mastering stress management techniques like yoga and meditation for maintaining work-life balance.
- Cultural Awareness: Enhancing understanding of Indian ethos and values to apply in diverse cultural settings.
- **Problem-Solving:** Cultivating the ability to address leadership and ethical challenges with innovative solutions based on Indian and global management principles.

REFLECTIVE STUDIES AND CASE STUDIES **Reflective Exercise on AI Problem Solving in Business:** Reflect on how Artificial Intelligence can be applied to solve complex business problems. Consider its impact on decision-making processes, knowledge transformation, and efficiency improvement in business operations. Source: Artificial Intelligence for Business Decision Making Case Study on Knowledge Mapping in AI: Google DeepMind's Knowledge Acquisition This case study examines how Google DeepMind used AI-driven knowledge mapping techniques to revolutionize machine learning and human capital analytics. It highlights the transformation of knowledge and skills using forward and backward thinking in AI systems. Available at: Harvard **Business Review Reflective Exercise on Modelling AI for Efficiency:** Reflect on the psychological modelling and efficiency improvement aspects of AI. How do businesses leverage AI for creating intelligent systems, benchmarking analysis, and enhancing business models? Source: Psychological Modelling in AI Case Study on Intelligent Cycle and AI Decision Making: IBM Watson's Business **Intelligence Applications** This case study focuses on how IBM Watson applied the intelligent cycle model to enhance business decision-making. It discusses how AI synthesized facts, perceptions, and projections to offer intelligent solutions to complex business problems. Available at: Harvard Business Review Reflective Exercise on Business Intelligence and AI in Decision-Making: Reflect on the role of Business Intelligence (BI) and AI in interpreting big data. How can Alpowered tools like Power BI enhance competitive intelligence and provide solutions for modern businesses? Source: AI and Business Intelligence in Big Data **COURSE OBJECTIVE:** in the business world, competition is the main factor, intelligence is prerequisite for understand to meet competition. AI and BI are essential learning and analytical concepts. So that, students can enhance their intelligence and they can take-up career in these fields. **COURSE OUTCOME** CO₁ Understand the fundamentals of Artificial Intelligence (AI), including its meaning, scope, and application in business problem-solving and cognitive science. CO₂ Explore knowledge mapping techniques, including AI-driven knowledge creation, human capital analytics, and mind mapping for business value CO₃ Learn AI modelling and its applications, including intelligent systems, psychological modelling, and business model analysis for improving efficiency. CO₄ Analyze the intelligent cycle in decision-making, including components like facts, beliefs, and projections, and how AI unlocks value for business problemsolving.

CO5	Comprehend the role of business intelligence (BI), its importance in
	decisionmaking, big data interpretation, and recent trends in business analytics
	and competitive intelligence

Pedagogy:

The module will feature **lectures** on AI modelling techniques, combined with **business model analysis** through AI. Students will engage in **interactive group projects** to explore intelligent system development and psychological modelling. **Benchmarking analysis activities** will allow students to compare AI applications across industries. **Reflective discussions** will be encouraged to examine AI's role in enhancing business efficiency.

• Skill Development:

- **AI Modelling**: Strengthen the ability to design and implement AI models for business applications.
- Business Efficiency: Develop skills in improving business operations through AI.
- **Appreciative Intelligence**: Build skills in recognizing and developing AI-driven opportunities.
- **Benchmarking Analysis**: Enhance capabilities in evaluating AI-based solutions against industry standards.
