REPORT ON INDUSTRIAL VISIT

Title	Industrial Visit to BAMUL Nandini Dairy Kanakapura.
Date of Event(s)	28-11-2024
Department/Association/ Cell/Committee	School of Commerce
Venue <i>(Mention the platform if it is online)</i>	Kanakapura, Ramanagara district, 562117
Number of Participants	49
Target Audience	V SEM B.COM E Section

Resource Person(s) with qualification (if applicable):	NIL

Place of visit/ details of Industrial Visit place (if applicable):	KANAKAPURA CHILLING CENTER, BAMUL, Ramanagara, Karnataka 562117
Event Coordinator	MS.SANDHYA KUMARI B

The objective of the Program:

1. To help students understand how concepts learned in classrooms are applied in real industry.
2. To allow students to observe current industry challenges, technological advancements, and innovative practices.
3. To observe the entire milk processing chain, from collection and pasteurization to packaging and distribution, giving students insight into how raw milk is converted into a consumable product.
4. To understand the quality checks, safety standards, and hygiene protocols involved in dairy processing to ensure the quality and safety of milk and milk products.

INTRODUCTION

The industrial visit to Nandini Milk Dairy provided an invaluable opportunity for students to observe and learn about the dairy industry's processes, operations, and management. Dairy farms and processing plants are pivotal in producing essential dairy products like milk, cheese, butter, and yogurt, which meet the daily nutritional needs of millions.

This visit enabled students to gain practical insights into the journey of milk — from its collection at the farm, through various processing stages, and finally, to its packaging and distribution to consumers.

Beyond understanding the technical aspects of milk processing, students witnessed:

- The implementation of strict hygiene standards and quality control measures for consumer safety.
- The machinery and technology used in dairy processing.
- Cold chain logistics employed to ensure product freshness.
- Sustainable practices adopted to minimize environmental impact.

Such experiences enhanced students' theoretical knowledge by bridging academic concepts with real-world applications in dairy science, food technology, quality assurance, and supply chain management. This visit is a stepping stone toward preparing them for future careers in these domains.

The outcome of the program:

- Students gained hands-on exposure to milk processing techniques, including pasteurization, homogenization, and packaging, enriching their academic learning with real-life applications.
- Students grasp the importance of logistics in the dairy industry, including milk collection, transportation, and storage, as well as the role of cold chain management in ensuring product freshness.
- Interacting with industry professionals helps students gain a clearer understanding of potential career paths in dairy technology, quality assurance, and food processing.

These outcomes collectively equip students with the knowledge and skills necessary to apply their academic learnings to future roles within the food and dairy industries.
