Electronics City, Bengaluru - 100

Accredited with NAAC "A" Grade || Recognised under 2(f) & 12(b) of the UGC Act
A FRANSALIAN INSTITUTE OF HIGHER LEARNING

Date: 16th September, 2019
Venue: Ananth Nagar
Conducted By: CSA, St. Francis De Sales College
Attended By: CSA Volunteers, Prof. Geetha P.S
Organized By: St. Francis De Sales College.

The environmental conditions in which we are living are becoming worse day by day. Earth temperature is rising swiftly. Pollution is spreading everywhere. Tree plantation is good for the environment. Everyone knows that trees are the source of oxygen. They inhale carbon dioxide and exhale oxygen without which the survival of living beings is not possible on earth.

More and more trees must be planted if we really want to survive and lead a good life. Besides exhaling oxygen and inhaling carbon dioxide, trees also absorb other harmful gases from the environment thus making the air purer and fresher. The greener the tree the more oxygen it shall produce and the more toxic gases it will absorb.

The pollution level these days is rising high. The only way to fight it is by growing more and more trees. The areas that are surrounded by trees, for instance, villages and forests boast of a cleaner environment. This is because these are less impacted by the pollution. On the other hand, the urban residential and industrial areas have poor air quality due to the growing pollution and lesser number of trees around.

Every year 21st March we celebrate the World Plantation Day, to inculcate the value of plantation. The aim of Tree Plantation Day is to make people aware of the importance of planting trees and help them realize the same.

A common practice during tree plantation day is to plant saplings in order to invest in the future. But why only plant trees when the day says so, every day is tree plantation day and we must work towards building a secure future for other generations to come. We should not be restricted by the standard norms of society and rise above ourselves and our nature before our selfish needs. If we don't save trees, in return our atmosphere will have less oxygen and the primary source of livestock and food will be eliminated from the earth. To understand the great importance of planting trees, here are some reasons why we must celebrate tree plantation day every year.

We commemorate the World Plantation Day, on behalf of St. Francis de Sales College, the Center for Social Action is celebrated Plantation Day on 16th September 2019. On that day with a support of Prof. Geetha P.S, the volunteers from Center for Social Action have planted trees in Ananth Nagar, Huskur Gate, Bangalore. Few volunteers have given speech on the importance of plantation in our society, such as since the very beginning trees have given us the gift of life's essentials, such as food and oxygen. Many generations passed and we discovered other many uses of trees and exploited them for our survival. They are so rich in value and significance that their uses have only increased as to satisfy the needs created by our modern lifestyles. To begin with, the wood from the trees was used as fuel and the fruits were consumed by humans. The shade was used to escape heat and fire to escape in cold.

As we evolved and started having modern problems, trees yet remained the same but cater to our modern problems as well. Trees can cut down on energy and conserve a lot of electricity if planted in the right place and they provide you with the richest oxygen available in the atmosphere. However, we overlook these benefits and take trees for granted. We cut the very trees that give us so much to live with and then mull over the fact that nature is being unfair. Well, we need to respect Mother Nature and value the great advantages that trees bless us with every day.

A tree, in its entirety has the ability to contribute each of its parts to sustain life. From its leaves to the roots and its bark, every part of a tree has something to offer and has profound value. To make you well-equipped with the benefits, here is a breakdown of the categories of perks that trees provide us, free of cost.
