Such tactics may include the use of logical fallacies, psychological manipulations, outright deception, rhetorical and propaganda techniques, and often involve the suppression of information or points of view by crowding them out, by inducing other people or groups of people to stop listening to certain arguments, or by simply diverting attention elsewhere. In *Propaganda: The Formation of Men's Attitudes*, Jacques Ellul writes that public opinion can only express itself through channels which are provided by the mass media of communication – without which there could be no propaganda. It is used within public relations, propaganda, marketing, etc. While the objective for each context is quite different, the broad techniques are often similar. The session undoubtedly threw light on the various realms of journalism and its slant towards politics. Journalism and Political Science students of all the three years benefitted from the session.
