MESSAGE FROM THE HOD

Do things right, Do right things.

We are proud to say that we are the citizens of a country which has discipline as its inherent culture. We have been practicing this noble character since centuries together.

To become a successful person in life discipline is essential. This helps to complete most of our works with ease; also it gives strength and increases concentration to complete with success. It helps to overcome laziness and overcome the attitude of 'postpoprocrastination'. Discipline enriches ones' mental and physical strength.

Discipline is the best teacher of any student. Moreover, it is directly related to time management and self-control. It's the basic and essential tool for the key to open the door of success. It bridges the gap between goals and accomplishment. It is a

precious treasure for the growth of youth .It helps every individual in shaping their personality and moulding their character.

All great men have made their history since they strictly followed discipline in their life. As the greatest scientist Alwa Edison says

SUCCESS = KNOWLEDGE + EFFORT

If you look at the formula $100 = 1\% + 99\%$ so however knowledgeable you are unless there is 99% of effort is given, success may not be yours. Effort comes when there is discipline in our thought that helps to result in success.

So to be a successful Desalite do things right and do the right things.
