# III Semester M.Com. Examination, March/April 2021 (CBCS Scheme) COMMERCE <br> Paper - 3.3 AT : Accounting for Managerial Decision 

Time : 3 Hours
Max. Marks : 70

## SECTION - A

1. Answer any seven of the following sub-questions. Each sub-question carries 2 marks.
a) Give the meaning of 'Responsibility Accounting'.
b) What is 'Zero Based Budgeting' ?
c) What do you understand by 'Inter firm Comparison' ?
d) Differentiate between Marginal Costing and Absorption Costing.
e) What is PV ratio ?
f) Give the meaning of 'Cost based decision making'.
g) What is 'divisional performance reporting' ?
h) What do you understand by the concept of 'Key factor' in Marginal Costing?
i) Define 'Residual Income'.
j) Expand PPBS and give its meaning.
SECTION - B

Answer any four questions. Each question carries 5 marks.
2. Mention the merits and demerits in measuring 'Divisional Performance'.
3. Discuss the procedure involved under inter-firm comparison.
4. Elaborate about 'Decision making process'.
5. ABC Ltd. has prepared the budget for the production of one lakh units of the only commodity manufactured by it for a costing period as follows :

Rs. (Lakhs)
Raw material
2.52

Direct Labour
0.75

Direct expenses 0.10
Works overheads ( $40 \%$ fixed) 2.25
Administrative overheads ( $90 \%$ fixed) 0.40
Selling overheads ( $70 \%$ fixed) 0.20
The actual production during the period was only 75,000 units. Calculate the revised budget cost per unit.
6. The following details are provided for Bhagwan Foods Pvt. Ltd. for the year ended 2020.

Rs.
Sales Revenue
Costs :
Materials
Labour
Production overheads
Apportioned group costs
Total
Other divisional information
Fixed assets investment
Working capital
Rs. 200 Lakhs
Rs. 50 Lakhs

## Rs. 250 Lakhs

Cost of capital is $12 \%$ as weighted average rate on the total capital employed.
Comment on the management performance of the division using
a) ROI method
b) RI/EVA method.
7. Graphics Ltd. Manufactures a document reproducing machine which has a variable cost structure as follows :
Rs.

Material 40
Labour
10
Overhead
4
The selling price is Rs. 90.
Sales during the current year is expected to be Rs. 13,50,000 and fixed cost Rs. $1,40,000$. Under a wage agreement, an increase of $10 \%$ is payable to all direct workers from the beginning of the forthcoming year, whilst material costs are expected to increase by $7.5 \%$, variable overheads by $5 \%$ and fixed overheads by $3 \%$
You are required to calculate :
a) The new selling price if the current Profit/Volume Ratio is to be maintained
and .
b) The quantity to be sold during the forthcoming year to yield the same amount of profit as the current year assuming the selling price to remain at Rs. 90.

Answer any three questions, each question carries twelve marks.
8. What are the pre-requisites for Responsibility Accounting? Mention the features and advantages of responsibility accounting.
9. What is a Uniform Costing Manual ? Explain in brief the advantages and limitations of uniform costing.
10. A company manufactures three products. The budgeted quantity, selling prices and units are as under :

Raw materials (@ Rs. 20 per kg)

| X (Rs.) | Y (Rs.) | $\mathbf{Z}$ (Rs.) |
| ---: | ---: | ---: |
| 60 | 60 | 40 |
| 10 | 5 | 10 |
| 10 | 30 | 20 |
| 9 | 22 | 18 |
| 5000 | 4000 | 2500 |
| 140 | 120 | 90 |

Virect wages (@ Rs. 5 per hour)
Variable overheads
Fixed overheads
Budgeted production (in units)
Selling price per unit (in Rs.)
i) Present a statement of budgeted profit.
ii) Set optimal product mix and determine the profit, if the supply of raw materials is restricted to 18000 kgs .
11. The following information is extracted from the records of the company.

## Particulars

Sales
Consumption of material
Material cost
Direct wages cost
Direct expenses
Machine hours used
Overhead expenses :
Fixed
Variable

| Per Unit |  |
| :---: | :---: |
| Product - A | Product - B |
| 100 | 120 |
| 2 kgs | 3 kgs |
| Rs. 10 | Rs. 15 |
| Rs. 15 | Rs. 10 |
| Rs. 5 | Rs. 6 |
| 3 hrs | 2 hrs |

Rs. 5
Rs. 10
Rs. 15
Rs. 20
Direct wages rate per hour Rs. 5. Comment on the profitability of each product (both use the same raw materials), then
i) Total sales potential in units is limited.
ii) Total sales potential in values is limited.
iii) Raw material is in short supply.
iv) Production capacity (in terms of machine of machine hours) is the limiting factors.
v) Assuming raw materials as key factor, availability of which is $10,000 \mathrm{~kg}$., and maximum sales potential of each product being 3,500 units, find out the product mix which will yield the maximum profit.
12. Auto Parts Ltd., has an annual production of 90,000 units for a motor component. The cost structure is as below :

Materials
Labour (25\% fixed)
Expenses:
Variable
Fixed

## Total

a) Purchase manager has an offer from a supplier who is willing to supply the component at Rs. 540. Should the component be purchased and production stopped?
b) Assume the resources now used for this components manufacture are to be used to produce another new product for which the selling price is Rs. 485.
In the latter case, the material price will be Rs. 200 p.u. 90,000 units of this product can be produced at the same cost basis as above for labour and expenses.
Discuss whether it would be advisable to divert the resources to manufacture that new product, on the footing that the component presently being produced would, instead of being produced, be purchased from the market.
