Time 3 Hours

ABC Ltd. budgets to manufacture 50000 units of product X. The variable 6. cost per unit is ₹ 10. Fixed cost are ₹ 3,00,000. The Finance Manager has suggested that the cost plus approach should be used with a profit mark-up of 25%. However, the Marketing Manager disagreed and has supplied the following information :

(₹) Demand (Units)	
42000	
38000	
35000	
32000	
27000	

As a Management Accountant of the Company, you are required to analyse the above proposal and comment.

What is larget fath of repart patents

A Company wants to manufacture a new product against order, the initial 7. trails showed that the first unit would take 10 hours at ₹ 15 per hour and that the operations would be subject to a learning curve of 80%. The cost of materials per unit is ₹ 200 and overheads amount to 150% of labour cost. The first order received is for 8 units of the product.

What price should the firm quote to get a margin of 20% on sales ?

that out the advantages of strategic cost memagement.

Answer any three of the following questions. Each question carries twelve marks. nsteer any four of the following questions. Each question courses five pin 3x12=36

P.T.O.

Explain the procedure in the implementation of cost of quality report. 8.

Discuss "the fourning curve will pass through three different phases Briefly explain the applications of learning curve and explain the Managerial 9. Considerations in the use of Learning Curves. What are the benchts and limitations of transfer pricing

10. Discuss the issue involved in transfer pricing.

11. Arjun of Delhi presently operates his plant at 80% of the normal capacity to manufacture a product only to meet the demand of Government of Tamil Nadu under a rate contact.

He supplies the product for ₹ 4,00,000 and earns a profit margin of 20% on sales realizations. Direct cost per units is constant.

The indirect costs as per his budget projection are :

Indirect cost	20,000 units (80% capacity)	22500 units (90% capacity)	25000 units (100% capacity)	
Variable	80000	90000	100000	
Semi-variable	40000	42500	45000	
Fixed	80000	80000	80000	

He has received an export order for the product equal to 20% of its present operations. Additional packing charges on this order will be ₹ 1,000.

Arrive at the price to be quoted for the export order to give him a profit margin of 10% on the export price.

12. Godrej Company is organized into two divisions namely A and B produces three products, X, Y and Z. The following are the data per unit :

Particulars	X	Y	7
Market Price (₹)	120	115	100
Variable Cost (₹)	84	60	70
Direct Labour Hours	4	5	70.

PG-506

Maximum Sales Potential (Units) 1600 1000 600

Division B has demand for 600 units of products Y for its use. If Division A cannot supply the requirement, Division B can buy a similar product from market at ₹ 112 per unit.

What should be the transfer price of 600 units of Y Division B, if the total direct labour hour available in Division A are restricted to 15,000 ?
